# One Day Awareness Program on Six Sigma

Six Sigma is a disciplined, statistical-based, data-driven approach and continuous improvement methodology for eliminating defects in a product, process or service. It was developed by Bill Smith of Motorola and in the early 1980's based on quality management fundamentals, then became a popular management approach at General Electric (GE) with Jack Welch in the early 1990's. The approach was based on the methods taught by Dr.W.Edwards Deming, Walter A. Shewhart and Ronald Fisher among many other Quality Management Gurus. Hundreds of companies around the world have adopted Six Sigma as a way of doing business.

Six Sigma is an industry-accepted and proven methodology used for business process improvement and customer delight. The Six Sigma program applies several specialized skill sets like statistical measurement, process capability analysis, advanced statistical tools, design of experiments etc., and group facilitation to improve the operations. This methodology helps an organization to achieve a superior performance, improved profitability and is very effective for Manufacturing based businesses as well as those that are service related.

**NIQR Head Quarters** and **SIMA** jointly have planned to organize an One day Awareness Program on Six Sigma Principles, Methodology and Benefits” on **26<sup>th</sup> February 2019** at SIMA Training Centre, Irungattukottai.

The Program is designed and developed by the experts who have an excellent knowledge and experience in implementation of Six Sigma, application of statistical tools and techniques and the problem solving methodology in variety of industries.
